Education

Universitat Politècnica de València (UPV)
BSc in Data Science

Sep 2022 – Jul 2026
Valencia, Spain

Experience

Instituto de Ingeniería Energética (IUIIE), UPV
Data Scientist Intern

Jul 2025 – Present
Valencia, Spain

- Maintained, improved and expanded an automated reporting pipeline in Python + SQL Server for 5+ food manufacturing plants.
- Implemented an end-to-end multi-step electricity demand and solar generation forecasting system for a food industry plant (30 GWh/year), combining a hybrid LightGBM-ANN model and Random Forest with real-time weather data and an automated SQL Server pipeline, achieving 3.8% MAPE at 24h horizon.
- Developed PyQt6 GUI app for energy forecasting management, featuring interactive charts, metrics, and SQL Server integration for industrial users.
- Integrated meteorological data from Open-Meteo and AEMET APIs to enrich prediction and reporting features.

Menjars Cuca
Delivery & Customer Operations

Mar 2021 – Dec 2025
Alginet, Spain

- Order preparation, invoicing, cash management, and direct customer service.
- Developed communication and client-facing problem-solving skills in a fast-paced environment.

Projects

Electricity Forecasting System — Python, LightGBM, SQL Server, Open-Meteo

Feb 2025 – Jun 2026

- End-to-end forecasting system for industrial electricity demand and solar generation: ETL pipeline, feature engineering with meteorological variables, and multi-model architecture (Random Forest, LightGBM, ANN).
- Automated database ingestion, model retraining, and validation workflows on SQL Server.

Automated Industrial Reporting System — Python, SQL Server, Pandas

Jul 2025 – Jan 2026

- Designed a modular Python system generating weekly and monthly energy and water consumption reports for multiple industrial facilities, pulling data from SQL Server and exporting pdf outputs automatically.

Skills

Programming: Python, SQL (T-SQL / SQL Server), R, Bash

Machine Learning: Scikit-learn, LightGBM, XGBoost, Random Forest, SHAP, neural networks

Data Engineering: SQL Server, ETL pipelines, Pandas, NumPy, REST APIs

Visualization: Power BI, Tableau, Plotly, Matplotlib, Seaborn

Tools: Git / GitHub, Jupyter Notebooks, VS Code, Windows Task Scheduler

Operating Systems: Linux, Windows

Languages: Spanish (Native), Valencian (Native), English (C1)

Awards & Education Extras

Cambridge English Advanced (C1): University of Cambridge

Bachillerato: Matrícula de Honor — IES Hort de Feliu, Alginet
